

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (New): An information storage medium configured to have data recorded thereon and data reproduced therefrom by at least one of a recording and/or reproducing apparatus, said data including management information including still picture VOB group information, and still picture information, the information storage medium comprising:

a first recording area configured to record audio information of a still picture additional audio stream and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state,

video part size information indicating a size of a video part of the corresponding still picture video object, and

said still picture additional audio file information including number information of the still picture additional audio stream,

wherein the recording and/or reproducing apparatus accesses the still picture VOB group information of the second recording area to reproduce the still picture information.

Claim 17 (New): An information recording method for recording still picture information on an information storage medium, the information storage medium including,

- a first recording area configured to record audio information of a still picture additional audio stream and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and
- a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

the still picture VOB group information managing a corresponding still picture video object group and including,

- still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state,
- video part size information indicating a size of a video part of the corresponding still picture video object, and

said still picture additional audio file information including number information of the still picture additional audio stream,

the information recording method comprising:

- recording the still picture information in the first recording area; and
- recording the still picture VOB group information in the second recording area.

Claim 18 (New): An information reproducing method for reproducing still picture information recorded on an information storage medium, the information storage medium including,

- a first recording area configured to record audio information of a still picture additional audio stream and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state,

video part size information indicating a size of a video part of the corresponding still picture video object, and

said still picture additional audio file information including number information of the still picture additional audio stream,

the information reproducing method comprising:

reproducing the still picture information recorded in the first recording area based on the still picture VOB group information recorded in the second recording area.

Claim 19 (New): An information reproducing apparatus for reproducing still picture information recorded on an information storage medium, the information storage medium including,

a first recording area configured to record audio information of a still picture additional audio stream and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state,

video part size information indicating a size of a video part of the corresponding still picture video object, and

said still picture additional audio file information including number information of the still picture additional audio stream,

the information reproducing apparatus comprising:

a reproducer configured to reproduce the still picture information in the first recording area based on the still picture VOB group information recorded in the second recording area.
